Pine Needles

## Junipero Serra Birthday Celebration

Spleudid and impressive civic and religious ceremonies marked the celebration of the 205th anniversary of the birth of Father Junipero Serra, at the Mission Carmelo last Sunday morning.

The ceremonies began with a solemn mass at 10 o'clock, conducted by Father R M. Mestres, assisted by Rev J. P. Smith of the Paulist Church in San Francisco

At the civic celebration, which was held in the chapel, owing to the inclement weather, Frank H. Powers, Father Smith and Michaet Williams made interesting and impressive addresses. Former Congressman Joseph R. Knowland of Alameda, was unable to be present because of illness.

One of the most impressive (and lasting) features of the whole affair was the planting or the ten pine trees grown from seed produced by trees that shade the house wherein Serra first saw the light of day. There were also placed in the ground ten Monterey pines. The place selected for the planting is near the cross which marks the Prof. H. D. Gray of the Stanford English Department, with his family, is have for the winter.

L. S. Slevin went to the city last week to add to his stock of holiday merchandise.

Mrs. Irving Wright, who is oe cupying the Karmany place near Pebble Beach, has as guest Mrs. James Marwick of Montecito.

We're "over the top" and still going. Up to Wednesday evening of last week in the War Work drive \$1766 was on hand. The total has now reached \$1819.

Just a reminder! Next Mouday is the last day to pay the first installment on County and State taxes without paying a penalty.

Michael Williams, having finished his work in San Francisco in connection with the United War Work money raising campaign, is here for several months. He may go to New York in the spring.

Mr. and Mrs. Walter Richards of Kansas City, Mo., were Carmel visitors last week. Mrs. Richards is a niece of Mrs. W. B. Canine.

Mr. and Mrs. I. B. Waterbury and son Edward and dog Brownie were week-end visitors from Berkeley. Weather permitting, there will be Thanksgiving service at the Forest Theatre this morning at 11 o'clock, conducted by Miss Harrington. Rev. S. C. Thomas will preach. In case of rain, the service will be held at the Methodist Church. Often we do not miss nor fully

Often we do not miss nor fully appreciate things until we are deprived of them Our Library has been closed for weeks, and it was a hardship. It is open now. The Librarian will be glad to receive delayed subscriptions.

Arland Decker, who formerly resided here, now living in Sacramento, recently suffered a bad accident. His foot was smashed so that it was necessary to amputate one of the toes.

As compared with 1916 and 1917 the season's rainfall in Carmet is way above normal. From September 12 to November 24, this year, we had 10.29 inches. For the same period in 1917 the fall was only .28, and in 1916 but 2 39 inches.

Charles Francis Browne, a wellknown Chicago artist, who is now at Santa Barbara, will be here shortly, to remain either in Carmel or at the Highlands for several months.

Walter Basham, who has been ill some time, is getting stronger and more like his old self every day. He expects to be home at Christmas time,

Mrs W. Canine, "The Belgian Ladv," announces that December 10 is the last day upon which contributions for Belgian Xmas may be forwarded. She now has \$85.73. She wants a hundred.

"The Dryad," presented at the Forest Theatre last August by Miss Virginia and Douglas Whitehead and Galt Bell, is to begin a two weeks' run in San Francisco next Monday. Madame Ann Dare and party are going up for the opening.

WHAT an interest centered in that babe, wrapped in swad-dling clothes, lying in a man-ger at Bethlehem! Prophets were interested, angels were interested, the ages have been most deeply in-terested since. The shepherd's had perhaps some premonition. The seventy weeks of Daniel's prophecy were about inifilled. It may be at were about fulfilled. It may be at that very time they were talking of the coming of Christ.

Suddenly their attention was arrested by a strange sight in the heavens. It grew brighter and took the form of an angel, and then they heard a voice announcing the birth of Christ as glad tidings for all peo-ple, not to the Jews only. Then suddenly the air was filled with angels singing as if they had come right out from the air.

We know not their wonderful song, but part came to mortal ears, "Glory to God in the highest," etc. We know not who those angels were, but we fancy they were the redeemed. Adam was there; Eve was there. Eve, who in her maternal earnestness declared at the birth of her firstborn, "I have got a man from the Lord," hoping that that was he who should bruise the ser-pent's head. Now, in the fullness of time she had come to witness the birth of the babe who was to be the Saviour of her race. David, Elijah. Moses, the patriarchs, we believe. were with that heavenly host.

This song reveals three things: First.—The glorification of God through the incarnation. God has glory through his vast work in noture, his providence building up and casting down nations, etc.

In the incarnation there was spe cial glory. It was glory to God in the highest—highest, in that it was above all other glory, in that it ex-tended to all time and in that it wrought such wondress good

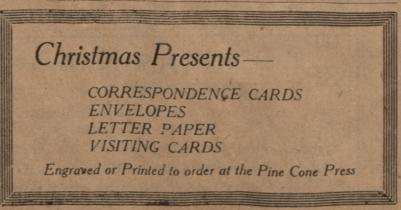

Second.—The great results to the earth. It would result in prace Strifes, thorns and thistles were abounding. The earth was torn and bleeding by constant contention. With Christ came peace. The result would be universal peace. Third.—The effect on the individ-nal man. "Good will toward men,"

from one another, from God. Out of this good will would finally spring peace on earth and glory to God in the highest.-Dr. Matthew Simpson.

It is now more than a century since an English army fought in Haly, and won the battle of Maida over the French. Napoleon had vowed to con-quer Sicily, and for that purpose the French pushed on into Calabria, and begin to make extension responsibles. began to make extensive preparations. But the English forces for the de-fense of Sicily prepared to deal a blow on the mainland. A force of 5,000 men landed in the bay of St. Emphe-mia, and the battalions of the French mia, and the barrenous of the Frence fell before the bayonets of the Brit-ish. Napoleon's hopes were shattered at a stroke. But the "daily-breader" from Kilborn traveling into London, by way of the Edgward road, never suspects as he passes by Maida Hill and Maida Vale, the origin of the name.

Human beitgs have a real sixth sense, says Science, in the shape of a sense of equilibrium. This sense is coming in for much intensive study to day, because it is probably the most important qualification for the success-ful aviator. It has been round to reside in three tiny canals in the inner ear. These three counts are located in the bone of the shull and are filled with a liquid in which nerve filaments from the auditory nerve terminate. In some way not yet clearly under-stood, through these canals and nerves the individual can tell, without being able to see or feel, just how nearly up-right his position is. The sense is much more keenly developed in some people than in others.

## Notice to Taxpayers

THE taxes on all personal prop-erty secured by real property, and one-half of the taxes on all real property, will be due and payable on the third Monday in October and will be delinquent on the first Monday in December next there thereafter, at 6 o'clock p. m., and that unless paid prior thereto, 15 per cent will be added to the amount thereof, and that if said one half be not paid before the last Monday in April next, at 6 o'clock p.m., an additional five per cent will be added thereto. The remain-ing one half of the taxes on all real property will be payable on and after the first Monday in January next, and will be delinquent on the las. Mooday in April next there-after, at 6 o'clock p.m., and that unless paid prior thereto, five per cent will be added to the amount thereof. thereof.

All taxes may be paid at the time the first installment, as here in provided, is due and payable. I will not make a collection trip throughout the county this year, hence all payments of taxes must be made at my office. J. E. HUNTER. Tax Collector

## FOOD PROGRAM CALLS FOR INCREASED SAVING

## America Must Save Millions From Famine in War or in Peace

From a harvest less in aggregate production than last year, America must save and export at least 17,700,-000 tons of foodstuffs overseas during the next nine months. This is approximately 12,000,000 ions greater than the average pre-war exports or nearly two tons from each farm in the country.

Intensive conservation of all food-stuffs and substitution of perishables such as vegetables and fraits, for nonperishables, like meats, fats and sugar, is the keynote of the new food saving program, which will be given in further detail to the people of America in the new home cards to be distributed beginning Dec. 1.

This new program differs radically from last year's program because the problem which confronts the nation has undergone a radical change.

Last year the great need was to save wheat. This year the demand is for the saving of foods of all kinds. Last year the use of wheat substitutes and the increased use of corn was tau jut. Now all foods which can be shipped are equally sacred.

Our great problem this coming year is to provide food for our arises and lay up a reserve for home use. Last year we shipped 11,800,000 tons of food. This year we must ship 17,700,-000 tons, and possibly far more.

In the new home card will be found the specific details of the appeal to the American people. That appeal in general is simply this:

SAVE SUGAR that our allies may have a fair portion.

SAVE MEAT, for meat is one of the foundations of the army ration and ou. allies are short of meat.

SAVE WHEAT, for it is the ideal food for export, the chief clement of the diet of all European people.

are USE VEGETABLES. They grown at home and they save meat and wheat

USE MILK. It is the best of all foods

USE FISH. It takes the place of meat.

USE FRUITS. They are grown near home. Their use saves sugar.

Avoid the use of articles imported or transported from long distances. We need the titleportation facilities.

#### **ITALY TO COLOR PETROL**

#### Plans Thus to Trace Sales of Army Owned Gasolene.

All petrol in Italy is used exclusively for army service and hardly any is available for private motor traffic. Au-tomobile owners, however, by paying prohibitive prices occasionally succeed in securing petrol destined for the army and detection is difficult owing to impossible identification of the petrol so used.

In order to simplify matters the army authorities have decided to color all the petrol, and as the dyes used after repeated experiments are perma-nent, it follows that a mere examination of the petrol used for private consumption is sufficient to trace its origin and justify immediate legal proceedings for its fraudulent use.

#### Again on Saturday

The town bell called out the fire department last Saturday morning to extinguish a blaze in the rear swing, and very shortly a definite part of Joybell cottage, just west date for the production will be anof Pine Inn. ## "World Relief Week" **December 1-7**

Intensive Food Saving Drive Planned to Create Surplus for Export to Famine Victims.

Issued by U. S. Food Administration for California

With the liberated peoples of Eu rope facing famine, and millions of women and children looking to Amer ica as their salvation from death by hunger and privation, the United States Government, through the Food Administration, has planned to launce a nation-wide intensive food saving drive beginning December 1st. This drive beginning December in drive will begin simultaneously in dist seven days. Dur ing this period the national conscience will be aroused to the dire necessities of the famine victims abroad, whose needs until their next harvest can filled only by rigid saving of foods in America's kitchens.

The seven days' campaign will be known as "World Relief Week" and will be ushered in by the reading of a will be ushered in by the reading of a special message from Federal Food Administrator Herbert Hoover in churches of all denomination throuchout the country. California's shale in the great drive was arranged at a meeting November 22nd in Sar Francisco, when all county food ad ministrators, women directors and food conservation speakers met under the auspices of the California Food Admin istration.

'the Hoover message will also be read during the week in all fraterna and other organizations, followed by and other organizations, followed by meetings in each county and city ander the direction of food adminis tration officials. On Wednesday, De cember 4th, special food saving exer cises will be held in women's clubs throughout the state, followed on Fri day by similar demonstrations in the public schools.

Under the direction of the speakers bureau of the Food Administration, zscore or more public speakers will tour the state, making addresses in hundreds of cities, towns and village and giving in detail the reasons why America must continue to expre-foods to the war-stricken victims of German militarism, as a measure to prevent anarchy and riots, to set "IF and maintain internal peace and amit and to permit the great work of eco nomic and political reconstruction to be pursued along broad humanitarian lines

Citizens of all California communities are urgently requested to aid in making "World Relief Week" another triumph for the idealism which American democracy stands for by attend. ing the meetings and heeding the message for food conse. vation.

When the Laugh Is on You. People are not very much inclined to laugh at the girl who is always ready to join in the laugh against her-self. It is the one who assumes airs of tremendous superiority, and seems to feel herself infallible, who needs to be afraid of making a slip. Even if people laugh at the girl who laughs at herself, there is always a tenderness in it, a kindliness that takes out all the sting. Learn to enjoy a joke on yourself.—Exchange.

M. F. H.-Master of Fox Hounds.

## Dramatic Classes Being Established

Garnet Holme has met with considerable success in his effort to establish classes for the study of the drama. Three times a week they are held in the morning at Arts and Crafts Hall.

Special scenes from Shakespeare are read and acted by the students are read and acted by the students and worth while passages com-mitted to memory. Modern plays are read and discussed, and in some instances criticisms thereon are written by class members. On Tuesday afternoous, at three o'clock, an informal discussion is held on some literary or demutia

held on some literary or dramatic subject. On one occasion Madam Ann Dare related details of her

Ann Dare related details of her wonderful work in pantomine, both in the drama and the dance. Last week the life and work of Mark Twain was touched upon, and the next informal conversa-tion will be on the subject of "Great Pageants." Mr. Holme will tell something of Percs Mac-kaye's "Caliban" pageant, a New York affair, of which he was one of the managers. the managers.

## WHEAT MAY BE USED FOR FEEDING PURPOSES

An order issued by the Food Administration permits mills, warehouses and grain dealers to sell wheat for feeding use. This ruling therefore re-scinds the special license regulations of the food administration which prohibited wheat to be used for any other purpose than milling. The removal of this restriction against the feeding of wheat will be of great benefit to the poultry sections particularly, as well as to the other feeding industries generally.

The prospects of a very largely increased wheat production for next year and other changes in the general situation have made it possible to refux this rule against feedbar wheat, which has hitherto been so rigidly enforced. or carrier of messages

#### Peculiar Pronunc

The pronunciation of English proper names is established arbitrarily and independent of ordinary rules. In England they pronounce the name of the poet Cowper, Cooper; that of Lord Cockburn, a former chief justice, Co-burn; that of Ear, Cholmondeley, an English general and poet. Chumly, Marjoribanks is pronounced Marchbanks, and Bolingbroke is Bulling-brook. The name of Hawarden castle, where Gladstone died, is pronounced Harden, and that of Colour St. Leger, who served in the revolutionary war, is pronounced Silijer.

When Letters Were a Luxury. In our modern speed of railroad travel, and the consequent facilities in the transmission of mail matter all over the civilized world, it is well enough to look back to the time when letter writing was a luxury indulged in only by a few, and communication between friends at a distance well nigh an impossibility. In its first applica-tion the word "post" meant a courier

## HOW COLD AFFECTS SOUNDS

#### Numerous Examples Can Be Given, but Exact Reason Is Hard to Explain.

A close observer describes two phenomena of nature not easily explained: First, that natural sounds are very different in the colder than in the warmer months of the year; and, second, that waters have different tints during the colder and warmer months. A number of examples occur to prove the first phenomenon. Who has not noticed the contrast in the noise of the wind in different seasons when it blows around the corner of the house-in summer what a soft, mellow tone it has and in winter what a harsh, rough whistle?

Then, again, let us stroll along the banks of a stream in May, June or July, and we will observe that the water will then make a gentle, babbling sound, while in November or winter it will, with not great volume, make a hoarse, gurgling noise.

Still again, if we ramble in the woods during late spring or early summer, we cannot but notice with what a softness and mildness the wind has been blowing through the tops of the trees; on the other hand, what a roaring it makes in cold weather.

Perhaps the trees being with or without foliage may cause some dif-ference, but it will be observed in May, before the leaves are out to any extent, there is even then a marked difference between that time and December. Often we have heard it along telegraph wires during the summer and winter, and have noted the con-trast.--St. Louis Globe Democrat.

# Economy in Wheat **Very Necessary**

Food Saving Program Remains Unchanged Except That Wheat Flour May Be Used Without Substitutes.

ASE

W

si

T

pe

DW

issued by U. S. Food Administration for California

San Francisco, Nov. 21.-Elimination of the substitute regulations has not relieved the imperative necessity for continued economy in the use of wheat flour in the homes of the nawheat notif in the homes of the ha-tion, and all public eating places will be held strictly to the order which forbids the service of more than two ounces of wheat bread per person at each meal.

This was announced today by the California Food Administration on ad-vices from Washington. Acting Fed-eral Food Commissioner Preston Me-Kinney explained that the former general wheat saving program remains in effect, with this change: Instead of eating bread mixed with substitutes it may now be used when made from pure wheat flour, but economy should be exercised in the consumption of all breadstuffs, as well as in other foods. The \$5.20 execution of parts

The 80-20 substitute rule was aban doued primarily to relieve a world-wide abortage in coarse grain feeds to the substitute flours were made from into a aim and consequently a great scaling for stock feeding developed. into a sain and consequently a great scale ity for stock feeding developed. In view of the large domestic wheat crop and the fact that additional stores of wheat were made available by the signing of the armistice, the Food Administration rescinded the substitute program to relieve the pres-sure of concase grains ungently needed sure on coarse grains urgently needed for American and European daily and swine herds, which have been greatly depleted by the war.

depleted by the war. Food officials explained that the abay domment of the substitute rule has been widely but erroneously mis-interpreted as meaning that further conservation of wheat products, par-ticularly flour, had become unneces-sary. In order to fulfill America's pledge to export approximately 20. 000,000 tons of food prior to J the 30th next, to prevent millions of liberated peoples from becoming famine vic-tims, the nation much restrict its wheat tims, the nation in act restrict its wheat consumption as rigidly as prevailed under the war program of food sav ing.

Eucalyptus Valuable Tree. Eucalyptus will grow under many adverse conditions, so long as they are adverse conditions, so long as they are protected from frost. The young trees cannot stand frost, and this fact has restricted the growth of the species to certain favorable sections of Cali-fornia and the Southwest. On the other hand, the trees will thrive on very poor soil and they do not require very much attention. Some of the largest commercial plantations, main-tained by railroad companies, for tietained by railroad companies for tiemaking purposes, are located along the shores of the Pacific ocean near San Diego, where their principal moisture comes from the heavy fogs that roll in from the sea, and which are absorbed by the leaves.
